Final Rejection

Applicant's arguments filed 4/7/06 have been fully considered but they are not persuasive for reasons detailed below.

The 35 U.S.C. 112 rejections are maintained or modified as follows:

These rejections have been withdrawn.

The prior art rejections are maintained or modified as follows:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2, 8, 11, 17, 23 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenfeld (US 4,036,365).

Rosenfeld teaches a method and apparatus (Fig. 1-3) for sorting laundry comprising a feed device with a funnel (20), a transport device (50, 52) with a transport band (152) which receives laundry pieces separated by a predetermined distance, a recognition device (32, 34), a registering device (col. 6, ln. 1-16), a processor (i.e., control means) (42), collection containers (60, 64, 66, 68, 70), and a collection device (42, 50).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenfeld in view of Weiss et al. ("Weiss") (US 4,239,435).

Rosenfeld as set forth above teaches all that is claimed except for expressly teaching a registering device either pre-disposed or post-disposed in relation to a collection device. Weiss, however, explicitly teaches the use of predisposed sensors (i.e., photodetectors/register devices) for each receiving/collecting station (Abstract; col. 14, ln. 48 et seq.). Moreover, the use of sensors for each collecting station allows the sorter to better coordinate the release of each article into a collection station as well as assuring that an article is present (Id.). Further, the positioning (i.e., post-disposed) of the sensor can be regarded as a mere design parameter well known to one with skill in the laundry sorter arts. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the invention of Rosenfeld as taught above.

Response to Arguments

Applicant's arguments that the prior art fails to teach the claimed features are unpersuasive. In particular, Applicant's focus on the dispensing action of the feeding

Art Unit: 3653

device is misplaced. A review of Rosenfeld clearly shows teaches that some form of feeding, dispensing and transporting is occurring in the laundry sorting device (Fig. 1), thus although the funnel may not be itself be involved in *active* dispensing it is clearly operating in conjunction with the transport conveyor and picker to dispense the laundry items. Consequently, the claims stand rejected.

Allowable Subject Matter

Claims 3, 10, 12-16 and 18-22, 24, 27-28 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Examiner has maintained the prior art rejections, statutory rejections and drawing objections as previously stated and as modified above. Applicant's amendment necessitated any new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3653

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
